

# FFLM Examinations Reading List

It is recommended that candidates read widely for the DLM, LFFLM and MFFLM Examinations. Examples of the core texts are given below and relevant FFLM guidance is available from [www.fflm.ac.uk](http://www.fflm.ac.uk). Throughout this document relevant hyperlinks are underlined in blue and can be clicked through to the source document or page.

Candidates will also be expected to be familiar with statutes (<http://www.statutelaw.gov.uk/Home.aspx>) and secondary legislation relevant to the practice of medical law and the candidates' area of practice, for example statutes relating to criminal investigation, procedure, and evidence. A number of these are included with descriptions within the [Legislation](#) heading of this document. A 'how to guide' for those unfamiliar with navigating the legislation website is included at the end of this document under [How to search on www.legislation.gov.uk](#).

It should be noted by candidates that the focus of the DLM and Part 1 is towards the legal aspect of medico-legal medicine rather than the clinical aspects. The Licentiate and part 2 Membership examinations are more clinical/practically focussed.

## Core Texts

	<p><b>Medicine, patients and the law.</b> 6<sup>th</sup> edition. Brazier, Margaret and Cave, Emma. Manchester University Press, 2016 ISBN 1784991368</p>	<p>A very readable book, recently updated to cover recent cases. It provides a survey of the legal situation in areas as diverse as fertility treatment, surrogacy, patient consent, euthanasia and the definition of death, malpractice and medical privacy. Relevant cases are analysed and explained.</p>
	<p><b>Mason and McCall Smith's Law and Medical Ethics</b> 11<sup>th</sup> Edition. Laurie G, Harmon S, and Dove E. Oxford, OUP 2019 ISBN 0198826214</p>	<p>Now in its 11<sup>th</sup> edition this classic and comprehensive textbook continues to evolve reflecting changes in the law and shifting ethical opinions</p>
	<p><b>Blackstone's Statutes on Medical Law</b> 10<sup>th</sup> Edition. Morris A, Jones M. Oxford, OUP 2019 ISBN 0198838794</p>	<p>An abridged collection of legislation curated by the authors</p>
	<p><b>Oxford Handbook of Forensic Medicine</b> ISBN 0199229945</p>	<p>A handy and affordable pocket guide to forensic medicine.</p>

## Regulatory Bodies

Candidates should be familiar with guidance produced by regulatory bodies.

### General Dental Council

The FFLM would expect our Dento-Legal Advisors to already be familiar with the GDC Standards for the Dental Team, and we would anticipate that candidates have an awareness of the 9 principles set out in the standards. Additionally the GDC has a series of case studies and learning materials, which although dentally focussed may be useful for candidates in reviewing general principles.

### General Medical Council

The FFLM particularly recommend that candidates review all of the GMC core and supplementary guidance. This includes [Good Medical Practice](#) as well as supplementary guidance such as [Confidentiality](#), [Consent](#), [Leadership & Management](#), [Raising Concerns](#) and [others](#).

### Nursing & Midwifery Council

In addition to being familiar with [The Code](#), candidates should also review guidance on [revalidation](#) and [duty of candour](#).

### Health & Care Professions Council

Candidates should be aware of which professions are [regulated](#) by HCPC as well as being familiar with their [core guidance](#).

## Legislation

Although all areas of clinical practice are covered to a greater or lesser degree by rules and regulations it is particularly important to be aware of the legislative framework we work within in forensic and legal medicine.

In General Forensic Medicine the two Acts we most commonly encounter within forensic clinical practice are The Police and Criminal Evidence Act (1984) and the Road Traffic Act (1988). Whilst it is not necessary to know the specifics of every section of these Acts forensic clinicians should be familiar with a number of areas contained within these Acts as well as broadly familiar with the other legislation listed below.

### Police and Criminal Evidence Act 1984

Often referred to as PACE this [Act](#) instituted a legislative framework to balance the powers of police officers in England and Wales with the rights and freedoms of the public. It has undergone a number of modifications since its inception and has equivalent Acts in Scotland ([Criminal Procedure \(Scotland\) Act 1995](#)) and Northern Ireland ([Police and Criminal Evidence \(Northern Ireland\) Order 1989](#) (SI 1989/1341)).

PACE should be read in line with its associated codes of practice. The most important of these for forensic clinicians is Code C which sets out the requirements for managing detainees in police custody. A link to an electronic version of Code C is contained in the list of useful websites at the end of this document.

Within PACE itself sections [55](#) and [62](#) relating to intimate samples and searches respectively should be read by candidates.

### Road Traffic Act 1988

The [Road Traffic Act 1988](#) covers a range of offences related to driving. It is an area of legislation where forensic clinicians are required to perform a range of roles.

Candidates should be familiar with the following sections of the Act:

[Section 4](#) - Driving, or being in charge, when under influence of drink or drugs

[Section 5](#) - Driving or being in charge of a motor vehicle with alcohol concentration above prescribed limit

[Section 5a \(inserted by Crime and Courts Act 2013\)](#) - Driving or being in charge of a motor vehicle with concentration of specified controlled drug above specified limit

[Section 7a \(inserted by Police Reform Act 2002\)](#) - Specimens of blood taken from persons incapable of consenting

[Section 9](#) – Protection for hospital patients

### Other Relevant Legislation

[Criminal Procedure and Investigations Act 1996](#) – Regulates the procedures of investigating and prosecuting criminal offences. The Criminal Procedure Rules are relevant for statements

## FFLM Examinations: Reading List DLM, Part 1 MFFLM, LFFLM

---

Mental Health Act [1983](#), [2007](#) and 2017– The 1983 Act aimed to consolidate the law relating to mentally disordered individuals. The 2007 Act introduced a number of changes to the 1983 Act as well as to the Mental Capacity Act to take account of changes in practice.

[Mental Capacity Act 2005](#) – As well as codifying how we assess mental capacity of patients by outlining statutory principles around capacity, this Act also established a new court – the court of protection

[Sexual Offences Act 2003](#) – Defines a range of sexual offences

[Offences Against the Person Act 1861](#) – Covers a range of offences consolidating case law into legislation. It has been subsequently amended and sections of it replaced by Acts including the Sexual Offences Act 2003 and The Criminal Justice Act 2003. You will often hear officers referring to Section 18 and Section 47 assaults and it is this Act they referencing.

[Police Reform Act 2002](#) – Includes the creation of the Role of Police Community Support Officers and the statutory requirement for formation of the Independent Police Complaints Commission. It also inserted S7a into the Road Traffic Act. Schedule 4 Part 3 of the Act deals with the powers and duties of detention officers.

[Terrorism Act 2006](#) – Detainees held under this Act may be referred to as TACT detainees.

[Terrorism Prevention and Investigation Measures Act 2011](#) – abolished control orders replacing them with terrorism prevention and investigation measures.

[Children Act 1989](#) (also [Children Act 2004](#) & [Children and Families Act 2014](#))– In particular establishes the principle that the child's welfare should be paramount. Established a range of duties relating to safeguarding.

[Human Rights Act 1998](#) – Requires UK public bodies to interpret legislation wherever possible in a way compatible with the rights laid own in the European Convention on Human Rights.

[Equality Act 2010](#) – Consolidated and codified a number of Acts relating to discrimination. Establishes protected characteristics and a duty for employers and service providers to make reasonable adjustments to accommodate individuals.

[Data Protection Act 2018](#) - Governs principles of data protection and information sharing incorporating the Genera Data Protection Regulation.

[Protection of Freedoms Act 2012](#) – Regulates retention and destruction of biometric data including DNA and fingerprints.

Although the general thrust of legislation in both Northern Ireland and Scotland is similar to that in England and Wales there are specific and important differences to represent the needs of those nations. Even for clinicians who do not work in these jurisdictions the different approaches to legislation can often be very informative to understand how law evolves especially when a more recent act incorporates lessons learned from rolling out similar legislation elsewhere.

### **Northern Ireland**

[Mental Health \(Northern Ireland\) Order 1986](#) – This order covers the assessment, treatment and rights of people with a mental health condition in Northern Ireland. It should be read in conjunction with the [1992 Codes](#) of Practice. Clinicians may also find the [Guidelines on the use of the Mental Health \(N.I.\) Order 1986](#) produced by the Guidelines and Audit Implementation Network in 2011.

[The Mental Capacity Act \(Northern Ireland\) 2016](#) this act takes into account the findings of the [Bamford Review](#) which was carried out in 2007. It uses a subtly different method of assessing capacity to the MCA 2005 in England and Wales, which incorporates the principle of appreciation the relevance of information into the assessment (please not this is not yet in force)

[Sexual Offences \(Northern Ireland\) Order 2008](#) which brings the legislation in Northern Ireland more in line with that the rest of the UK, especially in connection with mandatory reporting of certain offences between minors.

[Road Traffic \(NI \) Order 1995](#) in particular articles 14-21 relating to alcohol/drugs

The [Children \(Northern Ireland\) Order 1995](#) is supported by guidance produced in [Cooperating to Safeguard Children and Young People Northern Ireland 2017](#). Additional very useful information for safeguarding of adults is found in the following documents [Adult Safeguarding: Prevention and Protection in Partnership 2015](#) and [Adult Safeguarding Operational Procedures 2016](#).

## Scotland

The [Criminal Justice \(Scotland\) Act 2016](#) is broadly analogous to the Police and Criminal Evidence Act in England and Wales, providing powers of arrest and modernising and enhancing the Scottish criminal justice system.

The [Mental Health \(Care and Treatment\) \(Scotland\) Act 2003](#) applies to individuals who have mental illness, learning disability or related conditions calling these mental disorders. It should be read in conjunction with the [2005 Codes of practice](#). It has been updated by the [Mental Health \(Scotland\) Act 2015](#).

Additionally, [the Adults with Incapacity \(Scotland\) Act 2000](#) introduced a system for safeguarding the welfare of and managing the finances and property of adults who lack capacity. It is underlined by a series of 5 principles (benefit, least restrictive option, taking account of the wishes of the adult, consultation with relevant others, and encouraging the adult).

Scotland followed England, Wales and Northern Ireland with the [Sexual Offences \(Scotland\) Act 2009](#), incorporating the first statutory definition of rape in Scots Law. It also creates several other offences under the law in Scotland.

Although the [Road Traffic Act 1988](#) also applies in Scotland limits under s5A came into force via [The Drug Driving \(Specified Limits\) \(Scotland\) Regulations 2019](#). Scotland also has differing limits for alcohol to England & Wales which were brought into force by [The Road Traffic Act 1988 \(Prescribed Limit\) \(Scotland\) Regulations 2014](#).

In 2014 the Scottish Parliament enacted the [Children and Young People \(Scotland\) Act 2014](#). This builds on and strengthens the [Children \(Scotland\) Act 1995](#).

## Authorised Professional Practice

Guidance produced by the College of Policing covering a wide range of areas from firearms to covert policing to mental health. Of particular relevance to forensic clinicians is the section on [detention and custody](#) which explores issues such as information sharing, management of substance misuse and mental health in custody. Additionally, there is a useful section on [mental health](#).

The [national decision model](#) provides guidance for police and police staff on making decisions as well as a framework for reviewing and challenging them centred around a code of ethics.

## How to search on www.legislation.gov.uk

We will use the example of finding S5a of the Road Traffic Act 1988

<p>Go to <a href="http://www.legislation.gov.uk">www.legislation.gov.uk</a></p>	
<p>Type Road Traffic Act into the title bar and 1988 into the year then click search</p>	

# FFLM Examinations: Reading List DLM, Part 1 MFFLM, LFFLM

Click on the relevant Act in the results

The screenshot shows the search results page on legislation.gov.uk. The search criteria are: Title: Road Traffic Act 1988, Year: 1988, Number: 52, Type: All Legislation (excluding draft). The results table shows four items:

Legislation by Type	Title	Years and Numbers	Legislation type
UK Public General Acts (3)	Road Traffic (Consequential Provisions) Act 1988	1988 c. 54	UK Public General Acts
UK Statutory Instruments (1)	Road Traffic Offenders Act 1988	1988 c. 53	UK Public General Acts
	<b>Road Traffic Act 1988</b>	1988 c. 52	UK Public General Acts
	The Road Traffic Act 1972 (Amendment) Regulations 1988	1988 No. 1036	UK Statutory Instruments

Find the section you need from the table of contents and click on it

The screenshot shows the 'Table of Contents' for the Road Traffic Act 1988. The 'Table of Contents' link is highlighted with a red circle. The table of contents lists various sections, including 'Part 1 Principal Road Safety Provisions' and 'Driving offences'. A red arrow points to section 1A, 'Causing serious injury by dangerous driving'.

The required section of the Act is available to read or print as needed.

The screenshot shows the full text of section 1A of the Road Traffic Act 1988. The section is titled 'Driving or being in charge of a motor vehicle with concentration of specified controlled drug above specified limit'. The text includes the following provisions:

(1) This section applies where a person ("D")—

- drives or attempts to drive a motor vehicle on a road or other public place, or
- is in charge of a motor vehicle on a road or other public place,

and there is in D's body a specified controlled drug.

(2) D is guilty of an offence if the proportion of the drug in D's blood or urine exceeds the specified limit for that drug.

(3) It is a defence for a person ("D") charged with an offence under this section to show that—

- the specified controlled drug had been prescribed or supplied to D for medical or dental purposes,
- D took the drug in accordance with any directions given by the person by whom the drug was prescribed or supplied, and with any accompanying instructions (so far as consistent with any such directions) given by the manufacturer or distributor of the drug, and
- D's possession of the drug immediately before taking it was not unlawful under section 5(1) of the Misuse of Drugs Act 1971 (restriction of possession of controlled drugs) because of an exemption in regulations made under section 7 of that Act (authorisation of activities otherwise unlawful under foregoing provisions).

(4) The defence in subsection (3) is not available if D's actions were—

- contrary to any advice, given by the person by whom the drug was prescribed or supplied, about the amount of time that should elapse between taking the drug and driving a motor vehicle, or
- contrary to any accompanying instructions about that matter (so far as consistent with any such advice) given by the manufacturer or
