

FACULTY OF FORENSIC & LEGAL MEDICINE

of the Royal College of Physicians of London

Registered Charity No 1119599

Novel psychoactive substances (NPS)

Wednesday 09 September 2020

Learning Objectives

- Understanding what NPS are, their effects and the different categories of NPS.
- Their impact cases.
- Appreciate the problems that arise during analysis of NPS and interpreting their presence in a case.

Presenter

Mr Hassan Kurimbokus

I have a Bachelor of Science degree with Honours in Forensic Science and a Master of Science degree in Forensic Toxicology by Research, both of which are from Bournemouth University. I am employed by Analytical Services International and have been engaged in the field of Forensic Toxicology since 2015. I have written around 3000 toxicology reports involving criminal investigations, both for the prosecution and the defence. The majority of these are involving the Road Traffic Act 1988. I have also written around 1500 toxicology reports for HM Coroner. I am a member of the London Toxicology Group and The International Association of Forensic Toxicologists. I have worked as both a Laboratory Analyst and a Reporting Officer. I specialise in the analysis and interpretation of alcohol, drugs and poisons within biological fluids.
