Fitness for detention and interview

Apr 2022 Review date Apr 2025 - check www.fflm.ac.uk for latest update

Confidential - Patient Identifiable Information

Note: This form has been designed by Prof Ian Wall on behalf of the Faculty of Forensic & Legal Medicine for use by Forensic Physicians (also known as Forensic Medical Officers in N. Ireland) and Healthcare Professionals. The form is provided to assist Forensic Physicians and Healthcare Professionals in determining whether a person is fit to detain and interview. It is to be regarded as an aide-mémoire and it is therefore not necessary for all parts of the form to be completed. On completion this form is the personal property of the examining doctor/Healthcare Professional.

1. General Details

4. Place of examination

Name	Medical room Cell
Address	□ Other
	Anyone else present
Date of birth	5. Information provided upon referral
Gender/ethnicity	Information from arresting officer (PC)
Occupation	
Reason for arrest	
Relevant property	
PNC Warning	Information from custody officer/police risk
Police station	assessment/restraint etc. (PS)
Custody record No	
Arrest date	
Arrest time	
Date called	6. Consent
Time called	Verbal consent obtained YES IND
Time arrived	Special features
Time examination started	-
Time examination completed	"I consent to a medical examination, including taking of
Time case completed	samples if appropriate,
GP	on myself or my
2. Visit requested by	as explained to me by
Detainee Police	I understand that Dr/HCP
□ Other	may have to produce a report based on the examination and that details of the examination may have to be revealed in court."
	Signed
3. Reason for assessment	Witnessed
□ Detention □ Interview □ Need for appropriate adult	Relationship of witness
□ Injuries □ Charge □ Transfer	
□ Other

Fitness for detention and interview Apr 2022 Review date Apr 2025

AIDE-MÉMOIRE

Fitness to be interviewed¹

PHIT

In assessing fitness to be interviewed by the police consider PHIT²:

- Personality factors suggestibility, compliance, acquiescence
- Health mental and physical (including substance misuse)
- Interview demands and characteristics of the interview
- Totality of the circumstances all other relevant circumstances of the arrest and custody

Vulnerabilities

Vulnerabilities to consider in the assessment of FTI³

Physical vulnerability	Mental vulnerability
Medication, e.g. concern re access/pain relief	Schizophrenia
<i>Epilepsy</i> : post ictal state; pre-ictal aura	Bipolar disorder
<i>Diabetes</i> : hypoglycemia (ideally the blood glucose should be over 6 mmol/l) ⁴	Psychotic episode, e.g. drug-related
Asthma	Depressive disorder (spectrum from severe to mild)
Cardiac disease	Attention deficit hyperactivity disorder (ADHD)/Attention deficit disorder (ADD)
Cerebrovascular disease	Acquired brain injury (ABI)
Alcohol intoxication, withdrawal, delirium tremens	Alcohol dependence, Korsakoff's syndrome, Wernicke's encephalopathy
Substance misuse/dependence including intoxication or withdrawal	Substance misuse/dependence including intoxication or withdrawal
Sleep deprivation	Intellectual disability
Injuries, e.g. <i>head injury</i> , fractures	Post-traumatic stress disorder (PTSD)
Pregnancy	
Conducted Electrical Devices	

Functional Assessment

Functional Assessment includes an assessment as to whether the detainee⁵:

- a) is aware of the reason for arrest
- b) understands the caution and can explain it
- c) understands their legal rights
 - their right to consult privately with a solicitor and that free, independent legal advice is available ('Do you need money in order to have a solicitor help you at the police station?' 'If you don't want a solicitor to help you now, can you change your mind later?')
 - their right to have someone informed of their arrest
 - their right to consult the Codes of Practice
 - if applicable, their right to interpretation and translation and their right to communicate with their High Commission, Embassy or Consulate
- d) is capable of making a rational decision (able to choose between relevant courses of action) and of carrying out the chosen course of action.

Page 7

Page 8

HCP Advice Required

The HCP should provide advice on

- the need for an appropriate adult (concept of vulnerability)
- whether reassessment of the person's fitness for interview is required at a later date
- whether a (further) specialist opinion may be required
- the risks of unreliability and attempt to quantify those risks (see below).

Risk Categories

Four categories of risk have been identified⁶:

- Definite unlikely to be fit for interview at any stage e.g. severe dementia
- Major risk unfit at present. Needs re-assessment or review at a later stage to establish FTI, e.g. intoxication with alcohol and/or drugs
- Some risk precautions advised e.g. presence of AA or referral for other medical or psychiatric advice e.g. schizophrenia, depression, mild intellectual disability
- No discernible risk

Fitness to be Charged⁷

A person will be fit to be charged if he/she is capable of:

 understanding the meaning of the written notice detailing the particulars of the offence (which should be stated in simple terms as well as following the precise wording of the offence in law);

and

• understanding the meaning of the statutory warning that precedes the details of the charge.
