

FFLM Sample OSCE Construct

Please note domains vary depending on the station topic.

Construct:

This tests the ability of candidates to take a relevant focused history from an adult complainant of a sexual and physical assault, accurately document the details of the specific injury requested and to be in a position to give an explanation of the relevant injury to a professional colleague. This includes describing the likely causation of the injury and how that opinion was reached.

1. **Information gathering: verbal communication** - includes appropriate introduction, explicit consent, ability to keep the complainant to the point without making them feel uncomfortable, use of appropriate language
2. **Information gathering: clinical content** - includes brief relevant clinical history and how injury allegedly caused with a planned logical approach
3. **Forensic examination of injury** - uses appropriate equipment including personal protective equipment and is methodological in approach.
4. **Recording of injury on diagram** - makes an accurate record using all of the normal forensic descriptors as well as labelling, dating and signing the body chart itself
5. **Explanation of the injury** - terminology and accuracy - includes clear and concise language, correct technical and lay terms.
7. **SP to mark rapport and professionalism** of the Forensic Practitioner.
